EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. This communication is an Examiner's reasons for allowance in response to application filed on 1/14/01, assigned serial 10/030912 and title "Navigation device".
2. The following is the Examiner's statement of reasons for the indication of allowable subject matter:

After carefully reviewing the application in light of the amended claims and the additional search of all the possible areas relevant to the present application, a set of related prior art references has been found, but those prior art references are not deemed strong to make the application unpatentable. Thus, it is found that the application is now in condition for allowance.

Although the references found disclose several claimed limitations, none of the references discloses a navigation device, comprising: when a road with time restriction is present in an optimal route to a destination, route searching outputs the optimal route to a display, and at the same time searches a route by-passing the road with time restrictions and outputs the route by-passing the road with time restriction to display, and selection which allows a user to select either the optimal route or the route by-passing the road with time restrictions (claim 1). Also, none of the references found, a navigation device, comprising: display details of the time restriction when a road with time restrictions is present in the route searched, and setting allowing a user to determine whether or not to avoid traveling on roads with time restrictions (claim 8). None of the references found, a route searching to search for a plurality of routes, wherein the plurality of routes includes an optimal route and at least one by-pass route, wherein the route searching selection is configured to search for the at least one by-pass route if the

optimal route includes roads with time restrictions (claim 12); and an interactive selector to allow the user to enter, modify, and/or delete time restriction information with respect to roads (claim 13). Also, none of the references found, an interactive route selection apparatus for navigation, comprising: after the route is displayed on the display, the interactive selector allows the user to add, delete, and/or modify time restriction information of roads along the route, the route searching searches for an updated route from a start to destination based on both the updated user-entered information, and the display displays the updated route searched by the route searching section (claim 16).

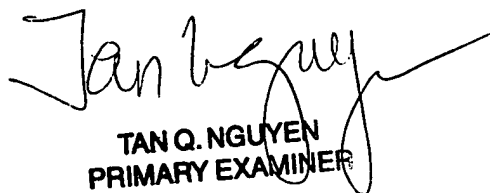

Claims 4-5,7-8,10,12-14, and 16-21, are allowable over the prior art of record.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dalena Tran whose telephone number is 703-308-8223. The examiner can normally be reached on M-F (7:30 AM-5:30 PM), off every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Black can be reached on 703-305-8233. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
